## Technology at work for you

CONNECTING YOUR BUSINESS TO THE TECHNOLOGY RESOURCES YOU NEED

The basic idea of our approach is to (i) understand the client and the “design problem” – to thoroughly understand the context in and the constraints under which a design solution must be produced. (ii) Use a variety of creative design techniques (everything from brainstorming through to visualization.

Through to exploring scenarios) to develop ideas for good designs. (iii) Build and refine prototypes with a series of quick iterations, to test the ideas against the customer in a real world context. (iv) Implement the concept in commercial context.
